Please consider filling out this 5-min survey https://lnkd.in/e3Ua_DD

Please also share the survey link - https://lnkd.in/e3Ua_DD - via social network posts, emails, text messages, and so on.

How data was collected

Invitations (https://lnkd.in/e3Ua_DD) were sent out to US citizens with at least high school degrees via emails. I use the Qualtrics system and its advanced features of anti survey stuffing, fraud scoring, and so on. No personal identifiable information (PII) was collected and we also avoided the kinds of questions that may be used to indirectly identify and/or harm survey participants. Each participant will have 48 hours to finish a 5-min survey. The unfinished survey will be automatically closed and discarded. At the moment of this report, I have collected over 1600 usable responses (n>1600).

I would like to thank Stanford Rebuild, NCSU, UMSL and the Chicago School of Professional Psychology for your inspirations and supports.
