Introduction

This report is based on findings from a nationally representative survey – *Climate Change in the American Mind* – conducted by the [Yale Program on Climate Change Communication](http://climatecommunication.yale.edu) (climatecommunication.yale.edu) and the [George Mason University Center for Climate Change Communication](http://climatechangecommunication.org) (climatechangecommunication.org). Interview dates: November 8 – 20, 2019. Interviews: 1,303 adults (18+), 1,114 of whom are registered to vote. Average margin of error for registered voters: +/- 3 percentage points at the 95% confidence level. A special thank you to Parrish Bergquist, PhD, Xinran Wang, and Andry Rajaoberison for creating an automated version of the data tables. The research was funded by the 11th Hour Project, the Energy Foundation, and the MacArthur Foundation.

Reading notes

- This report includes only registered voters.
- References to Republicans and Democrats throughout include respondents who initially identify as either a Republican or Democrat, as well as those who do not initially identify as a Republican or Democrats but who say they "are closer to" one of those parties (i.e., "leaners") in a follow-up question. The category "Independents" does not include any of these "leaners."
- In all tables, bases specified are unweighted, but percentages are weighted.
- For tabulation purposes, percentage points are rounded to the nearest whole number. As a result, percentages in a given chart may total slightly higher or lower than 100%. Summed response categories (e.g., "strongly support" + "somewhat support") are rounded after sums are calculated (e.g., $25.3\% + 25.3\% = 50.6\%$, which, after rounding, would be reported as $25\% + 25\% = 51\%$).
- Weighted percentages among registered voters of each of the groups discussed in this report:
 - Democrats (total) including leaners: 47%
 - Liberal Democrats: 25%
 - Moderate/Conservative Democrats: 22%
 - (Moderate Democrats: 19%; Conservative Democrats: 3%)
 - Independents excluding leaners: 10%
 - Republicans (total) including leaners: 38%
 - Liberal/Moderate Republicans: 13%
 - (Liberal Republicans: 2%; Moderate Republicans: 11%)
 - Conservative Republicans: 25%
 - No party/Not interested in politics/No response: 6% (included in results reported for "All Registered Voters" only)
- In the data tables reporting results for all waves of data collection, "--" denotes that there were no responses in that cell, whereas "0" denotes that there were responses, but the cell value is less than 0.5. In all other tables, "0" denotes that the cell value is between 0.0 and 0.5.

Executive Summary

Drawing on a nationally representative survey ($N = 1,303$; including 1,114 registered voters), this report describes how Democratic, Independent, and Republican registered voters view global warming, climate and energy policies, and personal and collective action.

Global Warming Beliefs and Attitudes

- Most registered voters (73%) think global warming is happening, including 95% of liberal Democrats, 89% of moderate/conservative Democrats, and 66% of liberal/moderate Republicans. Only 41% of conservative Republicans think global warming is happening.
- A majority of registered voters (59%) think global warming is caused mostly by human activities. This includes 84% of liberal Democrats, 72% of moderate/conservative Democrats, and about half of liberal/moderate Republicans (51%), but only 25% of conservative Republicans.
- Two in three registered voters (66%) are worried about global warming, including 94% of liberal Democrats, 88% of moderate/conservative Democrats (an increase of 20 percentage points over the past five years), and 53% of liberal/moderate Republicans. Only about one in four conservative Republicans (26%) are worried.

Global Warming and Energy Policies

Majorities of registered voters support specific policies to reduce carbon pollution and promote clean energy. These include:

- **A Revenue-Neutral Carbon Tax** – described as: “Requiring fossil fuel companies to pay a carbon tax and using the money to reduce other taxes (such as income tax) by an equal amount” – was supported by 69% of registered voters (87% of Democrats, 58% of Independents, and 48% of Republicans).
- **Fee and Dividend** – described as: “Requiring fossil fuel companies to pay a fee on carbon pollution, and distributing the money collected to all U.S. citizens, in equal amounts, through monthly dividend checks” – was supported by 59% of registered voters (77% of Democrats, 51% of Independents, and 40% of Republicans).

Large majorities of registered voters also support:

- Funding more research into renewable energy sources such as solar and wind (87% of registered voters, 96% of Democrats, 81% of Independents, and 77% of Republicans).
- Generating renewable energy on public land in the U.S. (86% of registered voters, 94% of Democrats, 79% of Independents, and 79% of Republicans).
- Providing tax rebates to people who purchase energy-efficient vehicles or solar panels (82% of registered voters, 95% of Democrats, 68% of Independents, and 70% of Republicans).
- Regulating carbon dioxide as a pollutant (75% of registered voters, 92% of Democrats, 62% of Independents, and 59% of Republicans).

Fewer registered voters support policies to increase fossil-fuel production, including:

- Expanding oil and natural gas drilling off the U.S. coast (47% of registered voters, 30% of Democrats, 37% of Independents, and 72% of Republicans).
- Drilling and mining fossil fuels on public land in the U.S. (43% of registered voters, 26% of Democrats, 34% of Independents, and 65% of Republicans).
- Drilling for oil in Alaska's Arctic National Wildlife Refuge (29% of registered voters, 16% of Democrats, 30% of Independents, and 46% of Republicans).

Additionally:

- Many registered voters (62%; 85% of Democrats, 57% of Independents, and 35% of Republicans) would support a U.S. president declaring global warming a national emergency if Congress does not act. Support among all registered voters increased by 17 percentage points during the seven months since our previous survey in April 2019.
- A large majority of registered voters (79%; 96% of Democrats, 79% of Independents, and 57% of Republicans) support schools teaching children the causes, consequences, and potential solutions to global warming.

The Paris Climate Agreement

- About three in four registered voters (76%; 94% of Democrats, 74% of Independents, and 54% of Republicans) support U.S. participation in the Paris Climate Agreement. Majorities of Democrats (92%) and Independents (66%) also oppose President Trump's decision to pull out of the Agreement.

Global Warming as a Voting Issue

- More than four in ten registered voters (45%) say a candidate's position on global warming will be "very important" when they decide who they will vote for in the 2020 presidential election.
- Of 29 issues asked about, registered voters indicated that global warming is the 11th most highly ranked voting issue (based on the percentage saying it is "very important"), six ranks higher than in April 2019 when it was the 17th most important issue. Global warming is the 3rd most highly ranked issue for liberal Democrats and the 7th most highly ranked issue for moderate/conservative Democrats.
- When then asked to choose their *most important issue* when voting for a candidate, seven percent of registered voters chose global warming, making it the 5th highest ranked *most important issue*. Global warming is the #1 *most important issue* for liberal Democrats (17%) and #5 among moderate/conservative Democrats (8%).

Acting on Global Warming

- Across party lines, a majority of registered voters say corporations and industry should do more to address global warming (74% of registered voters, 92% of Democrats, 69% of Independents, and 51% of Republicans).
- At least half of registered voters think citizens (68%), the U.S. Congress (66%), the Republican Party (66%), President Trump (65%), their own member of Congress (63%), the Democratic Party (61%), local government officials (59%), their governor (59%), and/or the media (55%) should do more to address global warming.
- A majority of Democrats (83%), about half of Independents (53%), but only about one in five Republicans (22%) think global warming should be a very high or high priority for the president and Congress. Developing sources of clean energy has even stronger support across party lines (89% of Democrats, 68% of Independents, and 49% of Republicans think it should be a very high or high priority).

1. The Politics of Global Warming Beliefs

1.1. Most registered voters think global warming is happening.

About seven in ten registered voters (73%) think global warming is happening. This includes nearly all liberal Democrats (95%), a large majority of moderate/conservative Democrats (89%), and two in three liberal/moderate Republicans (66%). In contrast, only about four in ten conservative Republicans (41%) think global warming is happening.

Most Registered Voters Think Global Warming Is Happening

Do you think global warming is happening? [% responding "yes"]

November 2019. Base: Registered American Voters.

1.2. A majority of registered voters think global warming is caused mostly by human activities.

A majority of registered voters (59%) think global warming is caused mostly by human activities. This includes about eight in ten liberal Democrats (84%), and about seven in ten moderate/conservative Democrats (72%).

About half of liberal/moderate Republicans (51%), but only about one in four conservative Republicans (25%), think global warming is mostly human-caused.

A Majority of Registered Voters Think Global Warming Is Caused Mostly By Human Activities

Assuming global warming is happening, do you think it is...? (a) caused mostly by human activities; (b) caused mostly by natural changes in the environment; (c) Other (please specify); (d) None of the above because global warming isn't happening. [% responding "caused mostly by human activities"]

November 2019. Base: Registered American Voters.

1.3. Two in three registered voters are worried about global warming.

Two in three registered voters (66%) are "very" or "somewhat" worried about global warming. This includes large majorities of liberal Democrats (94%) and moderate/conservative Democrats (88%). Over the past five years (since our October 2014 survey), the percentage of moderate/conservative Democrats worried about global warming has increased by 20 percentage points (see Data Tables, p. 28).

About half of liberal/moderate Republicans (53%) are worried about global warming. Only one in four conservative Republicans (26%) are worried.

Two in Three Registered Voters Are Worried About Global Warming

- % "very" or "somewhat" worried -

How worried are you about global warming?

November 2019. Base: Registered American Voters.

2. Who is Responsible for Action on Global Warming?

2.1. About three in four registered voters want corporations and industry to do more to address global warming. Most voters also want more action from citizens and government.

Across party lines, half or more registered voters say corporations and industry should do more to address global warming (74% of all registered voters; including 92% of Democrats, 69% of Independents, and 51% of Republicans).

Half or more of registered voters, including Democrats, Independents, and liberal/moderate Republicans, think citizens, the U.S. Congress, the Republican Party, President Trump, and/or their own member of Congress should do more to address global warming (see Data Tables, pp. 34–37). Half or more Democrats and Independents also think the Democratic Party and/or their local government officials should do more, and a majority of Democrats think their governor and/or the media should do more.

About half of liberal/moderate Republicans (54%) think their party (the Republican Party) should do more to address global warming, while only one in four conservative Republicans (25%) think so. Large majorities of both liberal Democrats (86%) and moderate/conservative Democrats (80%) think their party (the Democratic Party) should do more. Majorities of Independents think the Republican Party (63%) and the Democratic Party (59%) should do more.

About Three in Four Registered Voters Want Corporations and Industry To Do More to Address Global Warming

- % should be doing “much more” or “more” -

Do you think each of the following should be doing more or less to address global warming?

November 2019. Base: Registered American Voters.

2.2. Most Democrats think global warming should be a "high" or "very high" priority for the president and Congress. About half of Independents also think so.

A large majority of Democrats (83%) think global warming should be a high or very high priority for the president and Congress. About half of Independents (53%) also think global warming should be a high priority, but few Republicans (22%) think so.

Over the past five years (since October 2014), the percentage of Democrats who think global warming should be a high priority for the president and Congress has increased by 17 percentage points (see Data Tables, p. 30).

Most Democrats Think Global Warming Should Be A High Priority For the President and Congress

- % "high" or "very high" priority -

Do you think the following should be a low, medium, high, or very high priority for the president and Congress?
[Global warming]

November 2019. Base: Registered American Voters.

2.3. Most registered voters think developing sources of clean energy should be a "high" or "very high" priority for the president and Congress.

Many registered voters across parties, including majorities of Democrats (89%) and Independents (68%), and about half of Republicans (49%) think developing sources of clean energy should be a high or very high priority for the president and Congress.

Democrats think global warming (83%; see previous section) and developing sources of clean energy (89%) are similarly high priorities for the president and Congress. In contrast, clean energy is more highly prioritized than global warming by Independents (by 15 percentage points), and by Republicans (by 27 percentage points).

Most Registered Voters Think Developing Sources of Clean Energy Should Be A High Priority For the President and Congress

- % "high" or "very high" priority -

Do you think the following should be a low, medium, high, or very high priority for the president and Congress?
[Developing sources of clean energy]

November 2019. Base: Registered American Voters.

3. Support for Policies to Address the Pollution that Causes Global Warming

3.1. A majority of registered voters support a "Fee and Dividend" policy for carbon pollution.

A policy for mitigating global warming currently under consideration is a "Fee and Dividend" policy¹ in which fossil fuel companies would pay a fee on the carbon pollution they produce, and all the money collected would be distributed to all U.S. citizens, in equal amounts, through monthly dividend checks.

About six in ten (59%) registered voters support a Fee and Dividend plan, including majorities of Democrats (77%) and half of Independents (51%). Four in ten Republicans (40%) support the plan, including more than half of liberal/moderate Republicans (56%) but only three in ten conservative Republicans (31%).

A Majority of Registered Voters Support A "Fee and Dividend" Policy For Carbon Pollution

- % "strongly" or "somewhat" support -

How much do you support or oppose the following policy? Require fossil fuel companies to pay a fee on carbon pollution, and distribute the money collected to all U.S. citizens, in equal amounts, through monthly dividend checks.

November 2019. Base: Registered American Voters.

¹ <https://citizensclimatelobby.org/carbon-fee-and-dividend/>

3.2. A large majority of registered voters support requiring fossil fuel companies to pay a carbon tax.

A proposal similar to "Fee and Dividend" (see previous section) is often referred to as a "revenue-neutral carbon tax." It would require fossil fuel companies to pay a tax on the carbon pollution they produce, and would use that money to reduce other taxes (such as the Federal income tax) by an equal amount. About seven in ten registered voters (69%) support this plan (ten percentage points higher than the support for the "Fee and Dividend" proposal).

A large majority of Democrats (87%) and a majority of Independents (58%) support requiring fossil fuel companies to pay a carbon tax. About half of Republicans (48%), including a large majority of liberal/moderate Republicans (69%), but only 37% of conservative Republicans, support such a tax.

A Large Majority of Registered Voters Support Requiring Fossil Fuel Companies to Pay a Carbon Tax

- % "strongly" or "somewhat" support -

How much do you support or oppose the following policy? Require fossil fuel companies to pay a carbon tax and use the money to reduce other taxes (such as income tax) by an equal amount.

November 2019. Base: Registered American Voters.

3.3. Most registered voters, including Republicans, support climate-friendly energy policies.

Registered voters across the political spectrum support several other energy policies designed to reduce carbon pollution and fossil fuel dependence and to promote clean energy, including:

- Funding more research into renewable energy sources: 87% of registered voters, 96% of Democrats, 81% of Independents, and 77% of Republicans.
- Generating renewable energy (solar and wind) on public land in the U.S.: 86% of registered voters, 94% of Democrats, 79% of Independents, and 79% of Republicans.
- Providing tax rebates to people who purchase energy-efficient vehicles or solar panels: 82% of registered voters, 95% of Democrats, 68% of Independents, and 70% of Republicans.
- Regulating carbon dioxide as a pollutant: 75% of registered voters, 92% of Democrats, 62% of Independents, and 59% of Republicans.
- Requiring electric utilities to produce at least 20% of their electricity from renewable energy sources, even if it costs the average household an extra \$100 a year: 67% of registered voters, 87% of Democrats, 53% of Independents, but fewer than half of Republicans (43%).

About half or more *conservative* Republicans support funding more research into renewable energy (71%), generating renewable energy on public land (74%), providing tax rebates for purchasing energy-efficient vehicles or solar panels (61%) and regulating carbon dioxide (49%).

Most Registered Voters, Including Republicans, Support Climate-Friendly Energy Policies

- % “strongly” or “somewhat” support -

	All Reg Voters	Democrats				Republicans		
		Total	Lib	Mod/ Con	Ind	Total	Lib/ Mod	Con
		%	%	%	%	%	%	%
Fund more research into renewable energy sources such as solar and wind power	87	96	97	96	81	77	89	71
Generate renewable energy (solar and wind) on public land in the U.S.	86	94	94	94	79	79	88	74
Provide tax rebates for people who purchase energy-efficient vehicles or solar panels	82	95	95	95	68	70	86	61
Regulate carbon dioxide (the primary greenhouse gas) as a pollutant	75	92	94	90	62	59	78	49
Require electric utilities to produce at least 20% of their electricity from...renewables, even if it costs the average household an extra \$100/year	67	87	90	84	53	43	61	34

How much do you support or oppose the following policies?

November 2019. Base: Registered American Voters.

3.4. Registered voters are split on fossil-fuel production policies.

More than four in ten registered voters support expanding offshore drilling for oil and natural gas off the U.S. coast (47%), and about four in ten support drilling and mining for fossil fuels on public land in the U.S. (43%). Majorities of Republicans, but not Independents or Democrats, support these policies.

By contrast, fewer registered voters (29%) support drilling for oil in Alaska's Arctic National Wildlife Refuge (ANWR), while a large majority (70%) oppose it (see Data Tables, p. 40). About half of conservative Republicans (53%) support this policy, but liberal/moderate Republicans (32%), Independents (30%), and Democrats (16%) are much less likely to support drilling in ANWR.

Registered Voters Are Split On Fossil-Fuel Production Policies

- % “strongly” or “somewhat” support -

	All Reg Voters	Democrats				Republicans		
		Total	Lib	Mod/Con	Ind	Total	Lib/Mod	Con
	%	%	%	%	%	%	%	%
Expand offshore drilling for oil and natural gas off the U.S. coast	47	30	20	42	37	72	66	74
Drill for and mine fossil fuels (coal, oil, and natural gas) on public land in the U.S.	43	26	16	39	34	65	62	67
Drill for oil in the Arctic National Wildlife Refuge	29	16	10	23	30	46	32	53

How much do you support or oppose the following policies?

November 2019. Base: Registered American Voters.

3.5. Six in ten registered voters would support a president declaring a national emergency to act on global warming.

Sixty-two percent of registered voters would "strongly" or "somewhat" support a U.S. president declaring global warming a national emergency to act on it without Congress, a 17 percentage-point increase over the seven months since our previous survey in April 2019 (in which 45% of registered voters supported this action, see [Section 3.7 of our April report](#) for details). This action has the support of a large majority of Democrats (85%; a 20 percentage-point increase since April), more than half of Independents (57%; a 25-point increase), and about one in three Republicans (35%; a nine-point increase).

Six in Ten Registered Voters Would Support a President Declaring a National Emergency to Act on Global Warming

- % "strongly" or "somewhat" support -

If Congress does not take action on global warming, would you support or oppose a U.S. president declaring global warming a national emergency to act on it without Congress?

November 2019. Base: Registered American Voters.

3.6. A large majority of registered voters say schools should teach children about global warming.

The Next Generation Science Standards for K-12 STEM (Science, Technology, Engineering, and Mathematics) education in the United States² require that climate change be included in the curriculum.

A large majority of registered voters (79%) support schools teaching children the causes, consequences, and potential solutions to global warming. Support spans the political spectrum. Nearly all Democrats (96%), about eight in ten Independents (79%), and a majority of Republicans (57%) say they support teaching about global warming.

A Large Majority of Registered Voters Say Schools Should Teach Children About Global Warming

- % “strongly” or “somewhat” agree -

How much do you agree or disagree with the following statement...?

Schools should teach our children the causes, consequences, and potential solutions to global warming.

November 2019. Base: Registered American Voters.

² The Next Generation Science Standards were developed by a collaboration of scientists and educators at the National Research Council of the National Academy of Sciences; the American Academy for the Advancement of Science; the National Teacher’s Association; 26 states; and Achieve (a non-profit organization). Released in 2013, the standards represent the most current, research-based method of educating K-12 students in STEM and preparing them for STEM careers. See: nextgenscience.org

4. The Paris Climate Agreement

4.1. There is Bipartisan support for U.S. participation in the Paris Climate Agreement.

In December 2015, officials from 197 countries (nearly every country in the world) met in Paris at the United Nations Climate Change Conference and negotiated a global agreement to limit global warming. On Earth Day, April 2016, the United States and 174 other countries signed the agreement, with all of the other countries following suit. On June 1 2017, President Trump announced that the United States will withdraw from the agreement, and on November 4 2019, his administration began the formal process of withdrawing.

In contrast to President Trump's decision, about three in four registered voters (76%) support U.S. participation in the Paris Climate Agreement. Support varies by party, with nearly all Democrats (94%), about three in four Independents (74%), and about half of Republicans (54%) supporting U.S. participation.

Similarly, two in three registered voters (66%) oppose President Trump's decision to pull out of the Paris Climate Agreement, including 92% of Democrats and 66% of Independents, but only 31% of Republicans.

There Is Bipartisan Support For U.S. Participation in the Paris Climate Agreement

- In 2015, the United States signed an international agreement in Paris with 196 other countries to limit the pollution that causes global warming. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose the U.S.'s participation in the Paris Agreement?
- The U.S. is the world's second largest emitter of the pollution that causes global warming. President Trump recently announced his decision to pull out of the Paris Agreement, but all other countries responded that they remain committed to the agreement. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose President Trump's decision to pull out of the Paris Agreement?

November 2019. Base: Registered American Voters.

5. Global Warming as a Voting Issue

5.1. Most Democrats say global warming will be a very important issue when deciding who they will vote for in the 2020 presidential election.

Global warming is the 11th most highly ranked issue registered voters say will be "very important" to their vote in the 2020 presidential election, with 45% saying it is very important (see Data Tables, pp. 42–51). This is six ranks higher than [in April 2019](#), when global warming was the 17th most important issue ([when 38% of registered voters said it will be very important to their vote](#)).

Among Democrats, about seven in ten say global warming will be a very important issue in determining their vote for president (72%; an increase of eight percentage points since [April, 2019](#)). This includes 78% of liberal Democrats and 65% of moderate/conservative Democrats. Global warming is the 3rd most important voting issue among liberal Democrats, while environmental protection is 1st. Among moderate/conservative Democrats, global warming ranks 7th, with environmental protection 3rd. By contrast, global warming is near or at the bottom of presidential voting priorities among Republicans.

Most Democrats Say Global Warming Will Be a Very Important Issue When Deciding Who They Will Vote For In the 2020 Presidential Election

Rank by "very important"	All Registered Voters	Liberal Democrats	Moderate/Conservative Democrats	Liberal/Moderate Republicans	Conservative Republicans
1	The economy	Environmental protection	Healthcare	The economy	Border security
2	Healthcare	Healthcare	The economy	Social Security	The economy
3	Social Security	Global warming	Environmental protection	Healthcare	Terrorism
4	Gun policies	Developing clean energy	Social Security	Terrorism	Immigration reform
5	Education	Income gap	Russian election interference	Border security	Gun policies
6	Terrorism	Education	Education	Immigration reform	Social Security
7	Environmental protection	Russian election interference	Global warming	Gun policies	Healthcare
8	Russian election interference	Gun policies	Income gap	Education	Abortion
9	Immigration reform	The economy	Developing clean energy	Tax reform	Tax reform

27	Same-sex marriage	Legalizing marijuana	Wall Street reform	Legalizing marijuana	Income gap
28	Wall Street reform	War in Afghanistan	Legalizing marijuana	Same-sex marriage	Wall Street reform
29	Legalizing marijuana	Border security	Same-sex marriage	Wall Street reform	Global warming

In 2020, there will be an election to choose the U.S. president. As of today, how important will the following issues be to you when you decide who you will vote for in the 2020 Presidential election?

November 2019. Base: Registered American Voters.

After each respondent rated how important each of the 29 issues would be to their vote in the 2020 Presidential election, we showed them the list of issues they had rated highest and then asked, “Which one of these issues is the most important issue to you when voting for a candidate?”

Using this method, global warming is the 5th ranked voting issue among all registered voters, with 7% of registered voters saying it is their *most important issue*. For context “the economy” is the #1 issue for registered voters, with 14% saying it is the *most important issue*.

Among Democrats, global warming is voting issue #2 (13% of Democrats), below only healthcare (16% of Democrats). Global warming is the #1 *most important issue* for voting for president among liberal Democrats (17% of liberal Democrats) and #5 among moderate/conservative Democrats (8% of moderate/conservative Democrats). Global warming was near the bottom of the *most important issue* list for Republicans.

Global Warming Is the Top *Most Important Issue* Among Liberal Democrats When Deciding Who They Will Vote For In the 2020 Presidential Election

Rank by “most important”	All Registered Voters	Liberal Democrats	Moderate/Conservative Democrats	Liberal/Moderate Republicans	Conservative Republicans
1	The economy	<i>Global warming</i>	Healthcare	The economy	The economy
2	Healthcare	Healthcare	Social Security	Border security	Gun policies
3	Social Security	Income gap	Income gap	Social Security	Border security
4	Income gap	Environmental protection	The economy	Gun policies	Abortion
5	<i>Global warming</i>	Social Security	<i>Global warming</i>	Immigration reform	Healthcare
6	Gun policies	Russian election interference	Russian election interference	Terrorism	Immigration reform
7	Border security	The economy	Education	Federal budget deficit	Federal budget deficit
8	Environmental protection	Education	Race relations	Healthcare	Social Security
9	Abortion	Gun policies	Gun policies	Income gap	Terrorism
10	Education	Race relations	Environmental protection	Abortion	Improving roads, etc.

Earlier you said that the following issues are important to you when deciding how you will vote in the 2020 election for President. Which one of these issues is the most important issue to you when voting for a candidate?

November 2019. Base: Registered American Voters.

The percentages for all 29 voting issues can be found in the Data Table on p. 52.

Appendix I: Data Tables

(Base: Registered American Voters 18+)

Recently, you may have noticed that *global warming* has been getting some attention in the news. Global warming refers to the idea that the world's average temperature has been increasing over the past 150 years, may be increasing more in the future, and that the world's climate may change as a result.

What do you think: Do you think that global warming is happening?

(Base: Registered Voters)

Earlier you said that the following issues are important to you when deciding how you will vote in the 2020 election for President. Which one of these issues is the most important issue to you when voting for a candidate?

Programming notes: If more than one issue is selected above as “very important” above, display all “very important” issues. If no issues are selected above as “very important,” but more than one is selected as “somewhat important,” display all issues selected as “somewhat important.” If only one issue is selected as “very important,” do not display this question, but automatically enter that as “most important” issue. If no “very important” issues are selected, and only one “somewhat important” issue is selected, do not display this question, but automatically enter that issue as “most important.” If no issues are identified as either “very” or “somewhat important,” do not display this question and automatically enter response of “no ‘very’ or ‘somewhat’ important issue identified.”

Appendix II: Survey Method

The data in this report are based on a nationally representative survey of 1,303 American adults, aged 18 and older, 1,114 of whom are registered to vote. The survey was conducted November 8 – 20, 2019. All questionnaires were self-administered by respondents in a web-based environment. The survey took, on average, about 25 minutes to complete.

The sample was drawn from the Ipsos (formerly GfK) KnowledgePanel®, an online panel of members drawn using probability sampling methods. Prospective members are recruited using a combination of random digit dial and address-based sampling techniques that cover virtually all (non-institutional) resident phone numbers and addresses in the United States. Those contacted who would choose to join the panel but do not have access to the Internet are loaned computers and given Internet access so they may participate.

The sample therefore includes a representative cross-section of American adults – irrespective of whether they have Internet access, use only a cell phone, etc. Key demographic variables were weighted, post survey, to match US Census Bureau norms.

From November 2008 to December 2018, no KnowledgePanel® member participated in more than one *Climate Change in the American Mind* (CCAM) survey. Beginning with the April 2019 survey, panel members who have participated in CCAM surveys in the past, excluding the most recent two surveys, may be randomly selected for participation. In the current survey, 352 respondents, 295 of whom are registered voters included in this report, participated in a previous CCAM survey.

The survey instrument was designed by Anthony Leiserowitz, Seth Rosenthal, Matthew Ballew, Matthew Goldberg, Abel Gustafson, and Parrish Bergquist of Yale University, and Edward Maibach and John Kotcher of George Mason University.

Margins of error

All samples are subject to some degree of sampling error – that is, statistical results obtained from a sample can be expected to differ somewhat from results that would be obtained if every member of the target population was interviewed. Average margins of error, at the 95% confidence level, are as follows:

- Total registered voters ($N = 1,114$): Plus or minus 3 percentage points.
- Democrats (total; $n = 515$): Plus or minus 4 points.
- Liberal Democrats ($n = 282$): Plus or minus 6 points.
- Moderate/conservative Democrats ($n = 232$): Plus or minus 6 points.
- Independents ($n = 107$): Plus or minus 10 points.
- Republicans (total; $n = 441$): Plus or minus 5 points.
- Liberal/moderate Republicans ($n = 145$): Plus or minus 8 points.
- Conservative Republicans ($n = 294$): Plus or minus 6 points.
